EDUCATION

Year	Degree	Institute	CGPA/%
2019 - 2022	Masters Of Computer Applications	National Institute of Technology Warangal	6.7 CGPA

TECHNICAL SKILLS

- **Frameworks and Languages** : Python, C++, Javascript, Django, Streamlit, Node.js.
- **Platforms** : Dialogflow CX, CX Agent Studio, GCP, Kore.Ai, ServiceNow, Amelia, SharePoint.
- **GenAI Skills**: Agentic Ai, RAG, HuggingFace, Langgraph, Langchain, FastAPI, NumPy, Pandas, MCP, LangSmith.
- **Databases** : MySQL, Oracle SQL
- **Dev Tools** : Visual Studio Code, Curser, Gitlab, GitHub, Postman, Docker

WORK EXPERIENCE

- **Assistant Manager Developer, EXL Services**
(Jan 2025 - Present)
 - Supporting on **CX Agent Studio** platform for building AI-powered voice bots for banking clients.
 - Trained on **Google Cloud Skills Partner Portal** and **Udemy** in Google Dialogflow CX and CX Agent Studio with hands-on experience in building and deploying conversational AI virtual agents.
 - Developed chatbot solutions using intents, entities, flows, webhooks, **Python/FastAPI** integrations, and multi-platform deployments including Telegram and web applications.
 - Upgraded and configured end-to-end conversational AI workflow integrating Amazon Web Services Connect Flow, Amazon Lex, Lambda, and **Amelia** by migrating DEV, ACPT, and PROD environments with new App IDs, Secrets, Alias IDs, and URLs.
 - Automated deployment and configuration using Terraform and Azure Pipelines for seamless environment migration
 - Supported data analysis activities for chatbot conversation transcripts using Excel by filtering datasets, applying formulas, and generating insights from chat data.
- **SDE 1 - Conversational Ai Developer - LatentBridge pvt.**
(Gen Ai, LLM, AzureAPI, Kore.Ai, SearchAssist, , JavaScript, Rest-APIs, ServiceNow, Azure Graph Apis, Node.js, Ms Teams channel)
(Apr 2024 - Jan 2025)
 - Implemented **generative solution for a LLM** with the help of searchassist capability in kore Ai which helped providing contextual results eliminating user confusion.
 - Implemented solution for automatic ticket creation,incident fetch with the help of **ServiceNow REST api's** and configured all the platform components in order to have a seamless integration between the **CRM's**.
 - Integrated kore.ai powered chatbot with azure bot service in order to establish communication between **MS teams channel**,azure Ad and kore xo platform.
 - Developed and implemented a solution for setting up and managing **Out of Office status** via Microsoft Azure Graph APIs, allowing users to configure, update, and remove status messages and dates seamlessly.
- **Conversational Ai Developer Consultant - Genpact India pvt.**
(Oct 2022 - Mar 2024)
 - Worked with **Genpacts Core Virtual assistant** team and end-to-end delivered many chatbots for client and business and Hands-on experience on complex and optimized Dialog Creation.
 - Worked on Search assist Web Crawl, FAQs, Connectors share point.
 - Service now Rest API Integration on dialog flow and SNOW table Creations.

- Managed various tasks, including ticket **creation**, **monitoring ticket statuses** and **automating the BitLocker recovery key** retrieval process, saving over **500 hours every year** for the service desk team.

Organization Projects

- **IT and HR Assist Chatbot**
 - * Developed IT support chatbot solutions using Kore.ai, SearchAssist, Gen AI, and ServiceNow integrations
 - * Implemented BitLocker recovery automation, reducing Service Desk manual effort by 500+ hours annually
 - * Integrated ServiceNow REST APIs for automated ticket creation, incident fetching, and catalog management
 - * Configured digital forms and backend workflows for seamless IT support automation
- **Citizen Development Program (CDP)**
 - * Built chatbot workflows to collect employee enrollment data using digital forms and API integrations
 - * Integrated ServiceNow data tables and automated ticketing workflows for process management
- **Sourcing Chatbot**
 - * Integrated 5,000+ employee records into ServiceNow data tables (used as a DB) using CSV processing and composite key mapping
 - * Enabled Generative AI capabilities and sourcing policy retrieval for intelligent information access
- **MizAssist Chatbot**
 - * Developed enterprise IT support chatbot using Kore.ai, SearchAssist, Gen AI, Graph API, SharePoint, and MS Teams
 - * Configured Generative AI-based policy retrieval and SOP display with Azure Blob Storage image integration

Hands-on Learning Projects

- **Retail Virtual Agent (Dialogflow CX)**
 - * Built a retail virtual agent using **Dialogflow CX** to handle product search, FAQs, order status, and returns
 - * Designed intents, entities, and multi-turn conversational flows with context-aware conditional responses
 - * Integrated webhooks for dynamic responses and backend business logic
 - * Implemented fallback handling for low-confidence and unrecognized user queries
 - * Worked on conversational flow design, parameter handling, and route management
 - * Deployed virtual agents across web platforms using Dialogflow Messenger
- **Food Ordering Chatbot (Dialogflow CX)**
 - * Developed an AI-powered food ordering chatbot using **Google Dialogflow CX** with **WhatsApp integration**
 - * Designed conversational flows for food ordering, cart management, order tracking, and order confirmation
 - * Implemented intents, parameter handling, and multi-step conversation management using Dialogflow CX
 - * Integrated **backend/database** logic for menu validation, order status retrieval, and automated order ID generation
- **Agentic AI Chatbot**
 - * Built an production grade agentic AI chatbot using **LangGraph** with thread-based conversation memory
 - * Developed a Streamlit frontend supporting multi-session chat and real-time streaming responses
 - * Implemented **SQLite-based checkpointing** to persist conversation history
 - * Integrated **RAG**, tools, and database access for dynamic and context-aware responses
 - * Worked with LLM-based workflows and conversational state management
 - * Designed modular AI agent architecture for scalable chatbot interactions
- **Agentic AI Blog Generation System**
 - * Developed an Agentic AI-based blog generation system using **Groq LLMs** for automated title and content creation
 - * Implemented workflow orchestration using LangGraph and LangChain for structured AI content generation
 - * Built an interactive Streamlit frontend with FastAPI backend integration for scalable AI workflows
 - * Designed modular AI architecture using prompt engineering and API-based LLM integrations

COURSES AND CERTIFICATIONS

- Google Conversational AI Certificate: [Master Dialog flow CX-Build Engaging Chatbots](#)
- Google Conversational AI Certificate: [Leverage best practices for developing, operating, and securing prod-grade agents](#)
- Agentic Ai Certificate: [Complete Agentic AI Bootcamp With LangGraph and Langchain by Krish Naik](#)
- Agentic Ai Certificate: [Agentic AI Engineering Program By ADaSci](#)
- Generative Ai Certificate: [Generative Ai](#)
- Kore.Ai XO11 Basic and Advance Certificates: [Kore.Ai XO11 Basic and Advance](#)
